CONFIRMED DATABASE DEVELOPER

Software Developer | Full Stack Developer |

Database Developer

Implementation of numerous Oracle DB Views that support Power BI Reports, designed to monitor and track the progress of an agile program.

Developer & Team Lead

- Shopify Applications for Auto Fulfillment (Java Server): This comprehensive Shopify solution acts as middleware between Shopify and your local application. It facilitates communication with the Shopify server and databases (Oracle & SQL Server) to manage an online store's operations, from order placement to delivery. This application is fully integrated with Shopify and courier partners such as DHL, TCS, TRAX, Call Courier, TPL, and Swyft.
- Oracle EBS R12 Implementation & Development (Manufacturing, Supply Chain, Financials)
- API Integrations: Seamless integration of website servers, Oracle applications, and databases (Oracle, SQL Server) using RESTful APIs.

Developer

During the early years of my career, I completed numerous custom application developments using Oracle Forms & Reports. Below is a list of projects I have worked on:

- Integration of machine communication with databases and applications (Java, C#)
- E-Store online sales applications (Oracle Forms & Reports)
- Point of Sale systems in Java
- SQL & PL/SQL utilities
